DETAILED ACTION

Allowable Subject Matter

1. Claims 8-24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claims 8 and 11, recite, inter alia, "a plurality of chips, wherein each of the plurality of chips includes an analog-to-digital converter; one or more power lines connecting at least a portion of the plurality of chips, wherein the one or more power lines interconnect the portion of the plurality of chips to simultaneously run ADC test procedures on each chip in the portion of the plurality of chips."

claims 14 and 21, recite, inter alia, "a wafer including a plurality of separable image elements thereon, arranged in groups, each group having a plurality of said image elements therein; and a testing element, connectable to a plurality of said image elements, and operable when connected to said image elements to test each of said image elements in the group and report a result of said test."

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Kling (U.S. 5,701,665) discloses a Pi signal frequency filter method of manufacture and Kline (U.S. 6,759,741) discloses a Matched set of integrated circuit chips selected from a multi wafer-interposer, they do not disclose the above-mentioned limitations.

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
